

Entrepreneurship Development Cell

A typical constitution for an Entrepreneurship Development Cell (EDC) would outline its purpose, objectives, membership, responsibilities, and how it operates. It would also define the roles of key personnel like the in-charge, advisor, and faculty members. This structure ensures a clear and organized approach to promoting entrepreneurship within the institution.

Entrepreneurship Development Cell: An Entrepreneurship Development Cell (EDC) is a dedicated organization or unit often established in educational institutions with the goal of fostering entrepreneurial spirit and innovation among students, faculty, and the wider community. Here's a concise overview of its purpose, structure, and activities:

Vision:

To promote and nurture entrepreneurial spirit among students and empower them to become future entrepreneurs.

Mission:

To create awareness, provide training, and support entrepreneurial initiatives by fostering innovation, creativity, and leadership.

Objectives:

1. To create awareness about entrepreneurship as a career option.
2. To organize seminars, workshops, and talks by successful entrepreneurs.
3. To provide mentorship, guidance, and support to budding entrepreneurs.
4. To facilitate networking opportunities with industry experts, investors, and incubators.
5. To assist in the development of business plans and incubation support.
6. To collaborate with government bodies, NGOs, and other entrepreneurship organizations.

EDC Cell at PRIW: Recognizing the pivotal role of innovation and entrepreneurship in academic and institutional growth, Priyadarshini Institute of Science and Technology for Women (PRIW) established the Entrepreneurship Development Cell (EDC) as a strategic initiative to foster scientific research, industrial collaboration, and entrepreneurial thinking across various engineering disciplines.

The EDC at PRIW is envisioned as a dynamic platform that bridges the gap between theoretical knowledge and practical application, enabling students and faculty to transform innovative ideas into viable entrepreneurial ventures. By promoting interdisciplinary collaboration and industry-

oriented research, the EDC aims to contribute significantly to the vertical growth of the institution.

The EDC Cell is a nominated committee comprising experienced and dedicated professors representing different engineering programs. This multi-disciplinary approach ensures the inclusion of diverse perspectives and expertise, fostering a holistic ecosystem for entrepreneurship. This well defined structure enables smooth execution of activities, encourages proactive participation from all departments, and supports the institution's mission to become a center of excellence in innovation, entrepreneurship, and research.

Constitution of ED Cell

| S.No | Name of the Members | Designation | Role in the Committee |
